Ireland's Demography: Past, Present and Future

James Hegarty

Statistician, CSO

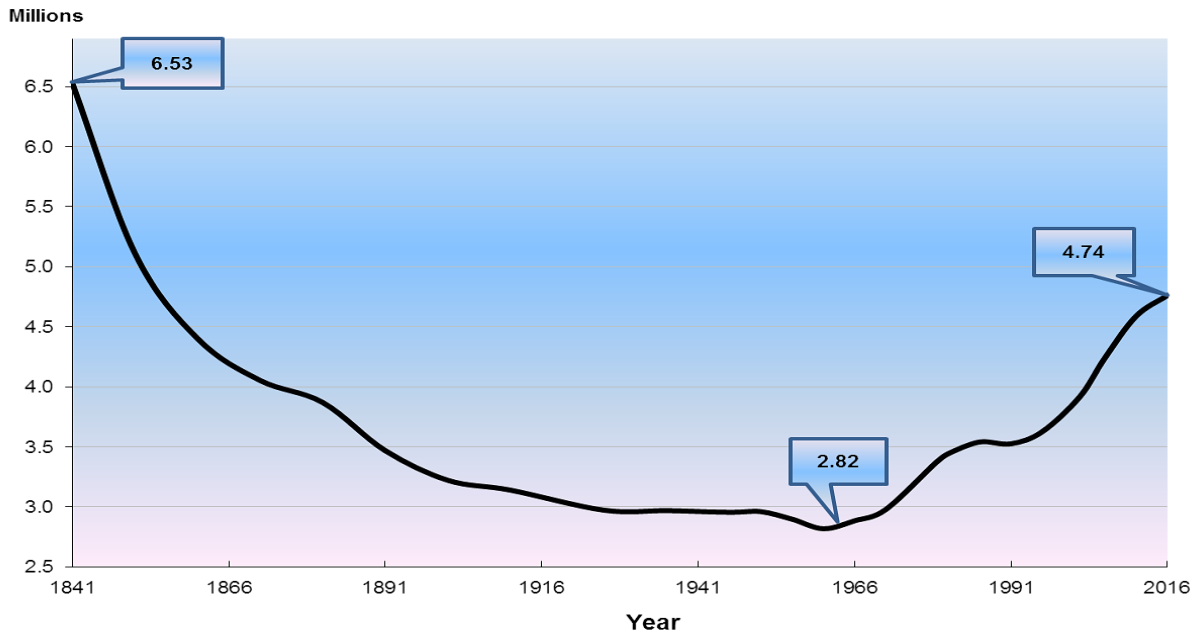

Croke Park, November 26th

Overview

- Historic perspective, 1841 - 2016
- Snapshot of current demographic trends
- Projections to 2051
- Focus on the younger and older age groups

Ireland's Population 1841 - 2019

Estimated Population April
2019 = **4,921,500**

Estimated Population growth of
180,000 since 2016

Births *minus* Deaths = **+90,000**

Inward migrants *minus* outward
migrants = **+90,000**

Urbanisation 1966 - 2016

- Dublin city & suburbs
- Cork city & suburbs
- Other three main cities
- Towns 10,000 or over
- Towns 5,000 - 9,999
- Towns 1,500 - 4,999
- Rural

3rd Level Education 1991

Males 14%

Females 13.2%

3rd Level Education 2016

Males 40.7%

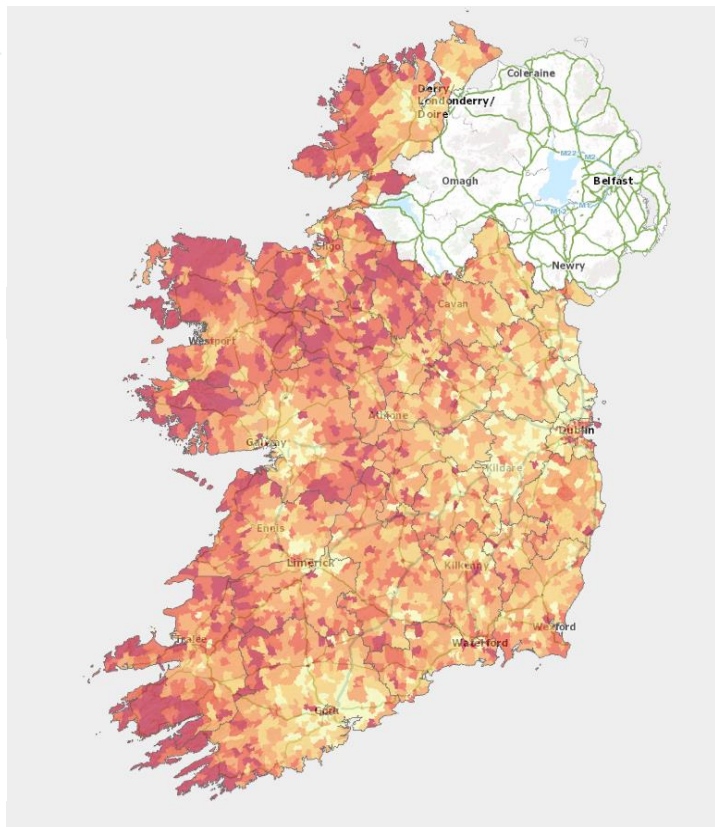

Females 43.2%

Map; Average Age by Electoral Division, 2016

An Age Profile in Ireland

Average age by Electoral Division, 2016

State Average Age =
37.4

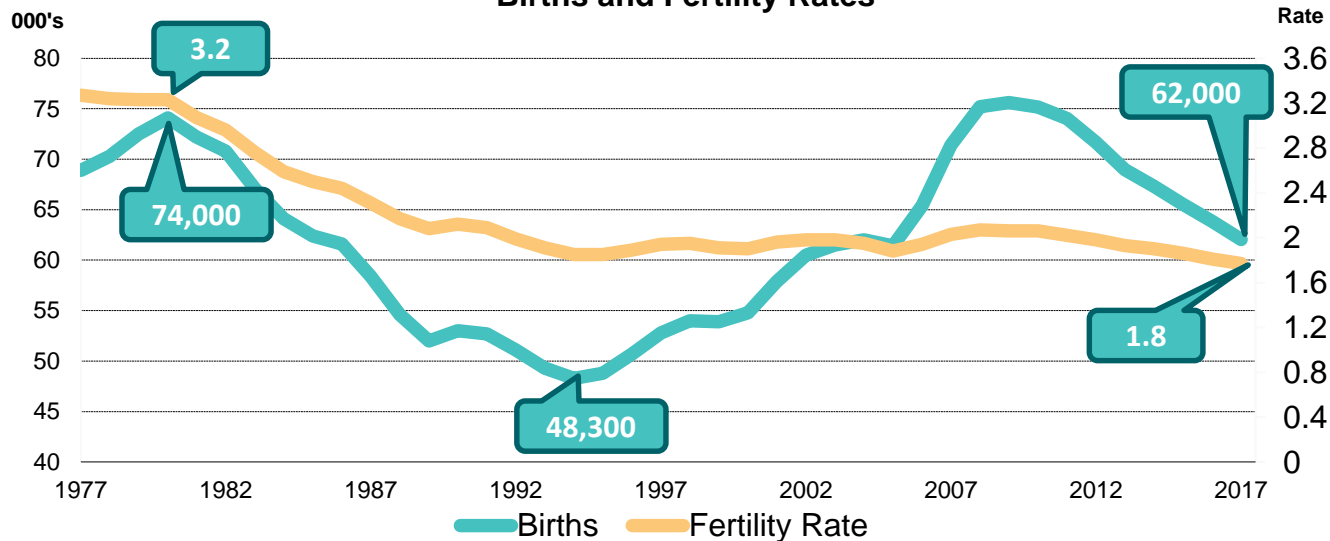

Oldest – Mayo and Kerry:
40.2

Youngest –
Fingal: 34.3
Kildare: 34.9
Meath: 35.2
South Dublin: 35.5

Births and Fertility 1977 – 2017

Births and Fertility Rates

**Average age of First
time Mothers
increasing *each year*
since 1975**

1980 - 24.9 Years

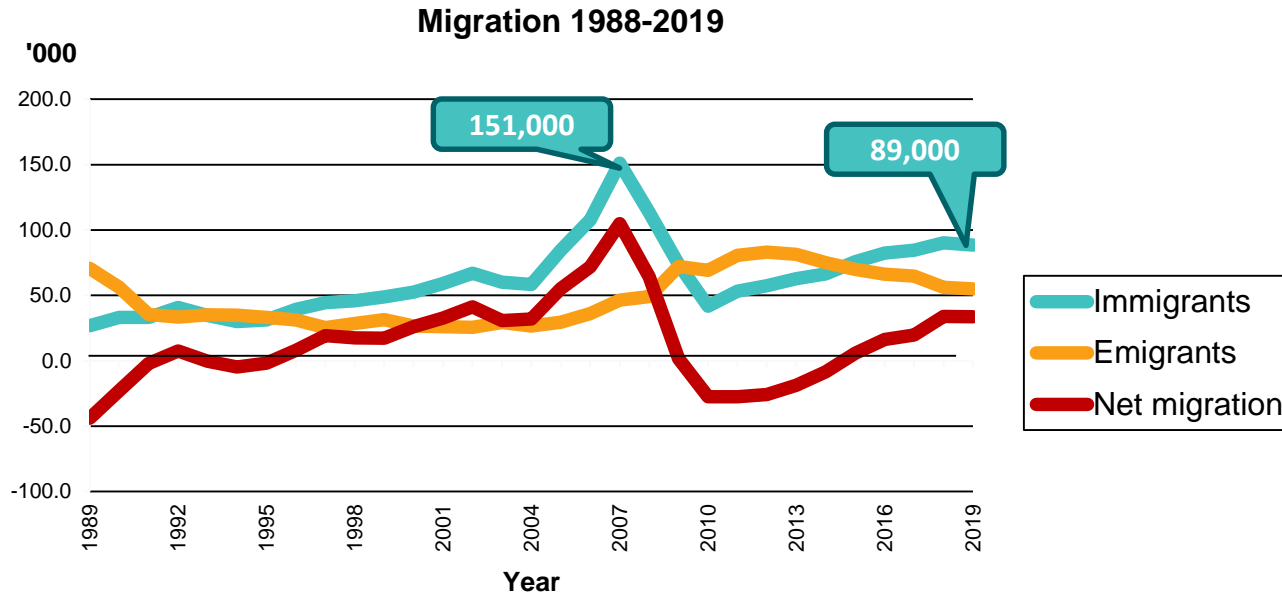

2017 - 31.0 Years

Fertility Assumptions - Current European fertility rates

Recent Migration trends 1988 - 2019

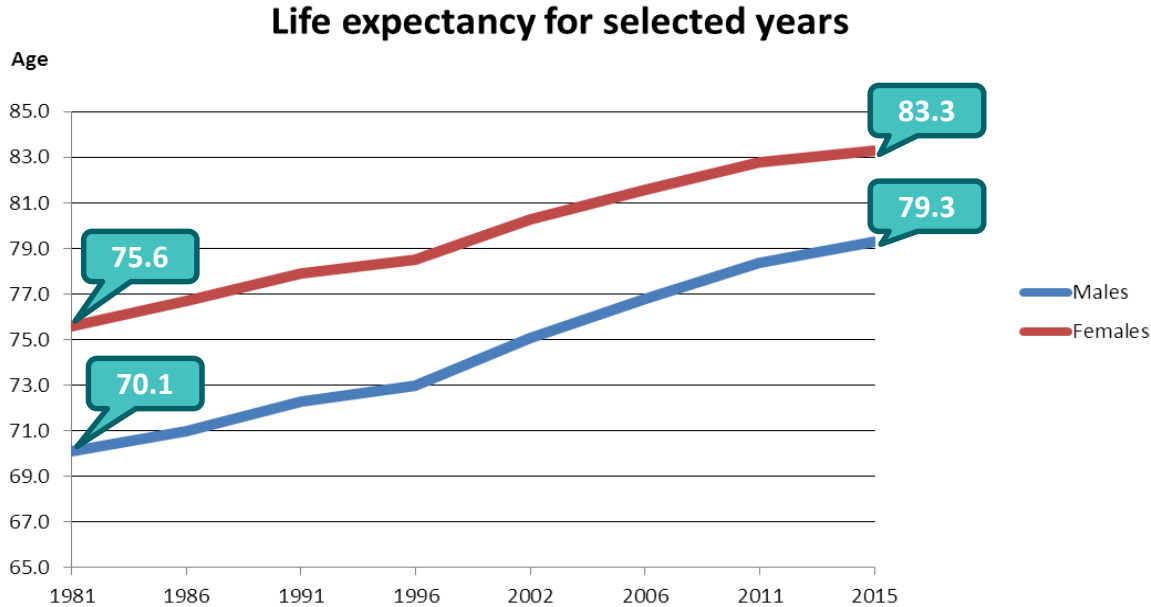

Average annual net in Migration

1987-2016 +21,000

2017-2019 +29,000

Life Expectancy 1981 - 2015

Since 1981 Life expectancy gains

Females +9.2 Years

Males +7.7 Years

In line with EU averages

Projection Assumptions agreed by Expert Group to 2051

3 Migration assumptions

- **M1 - High net inward migration +30,000 per annum**
- **M2 - Net inward migration +20,000 per annum (20 year average)**
- **M3 - Low net inward migration of +10,000 per annum**

2 Fertility Assumptions

- **F1 - Fertility rate to remain at the 2016 level of 1.8 until 2051**
- **F2 - Decline to continue to 1.6 by 2031 and level off thereafter**

Gains in Life expectancy to continue at a slower rate

- **79.3 years in 2015 to 85.6 years in 2051 for males – 6.3 years**
- **83.3 years in 2015 to 88.3 years in 2051 for females – 5.0 years**

Births, Deaths and Natural Increase (M1F2)

Natural Increase = births
minus deaths

Total natural increase of
690,000 2016 - 2051

Currently natural increase =
+30,000 annually

less than **+9,000** by 2051

Population Projections results 2016 – 2051

Total Population change

1,740,000

**Total Net Migration =
immigrants *minus* emigrants**

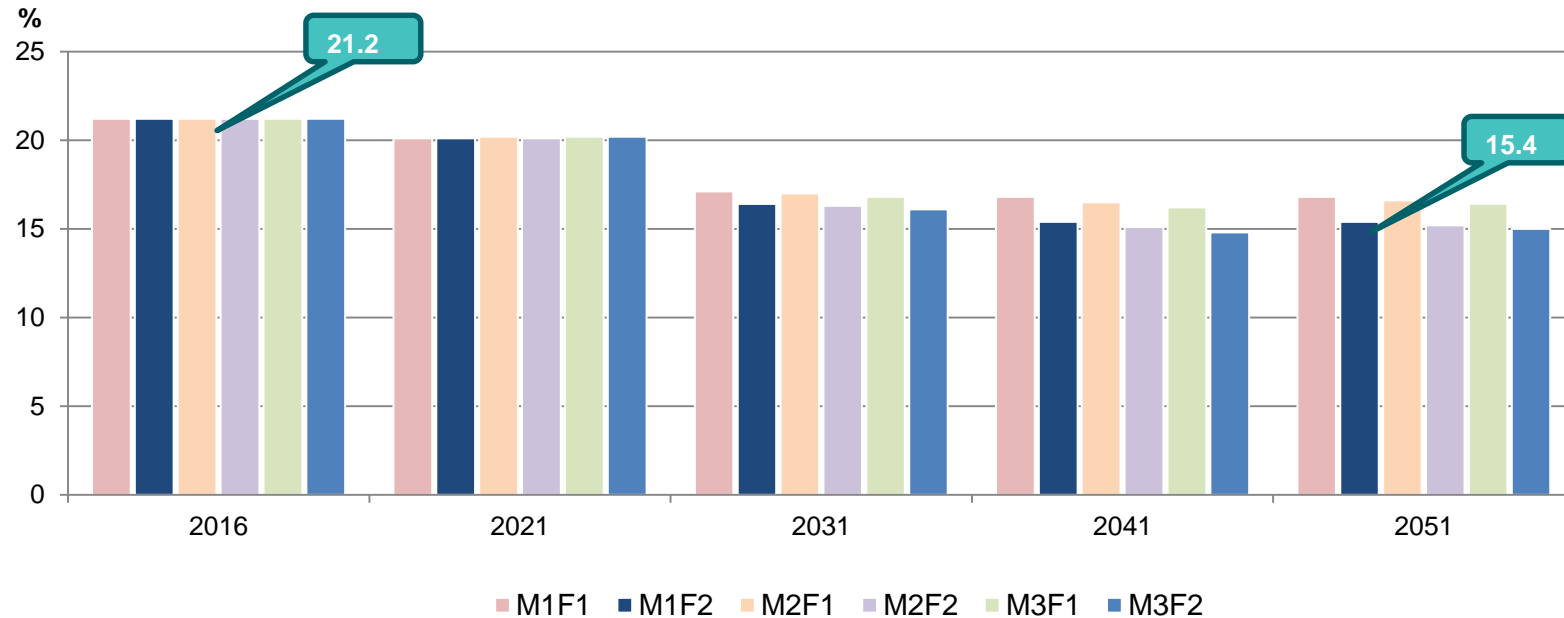

1,050,000

Total Natural Increase

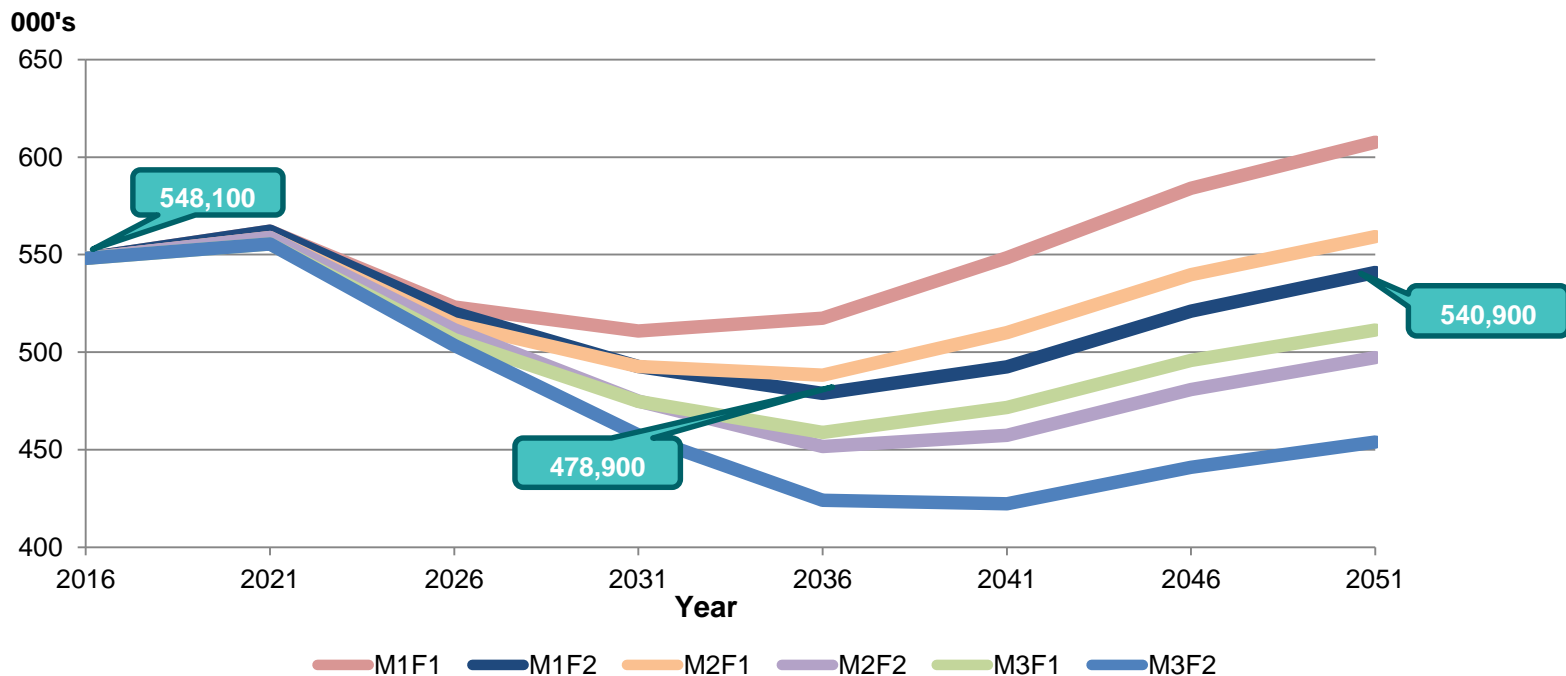

690,000

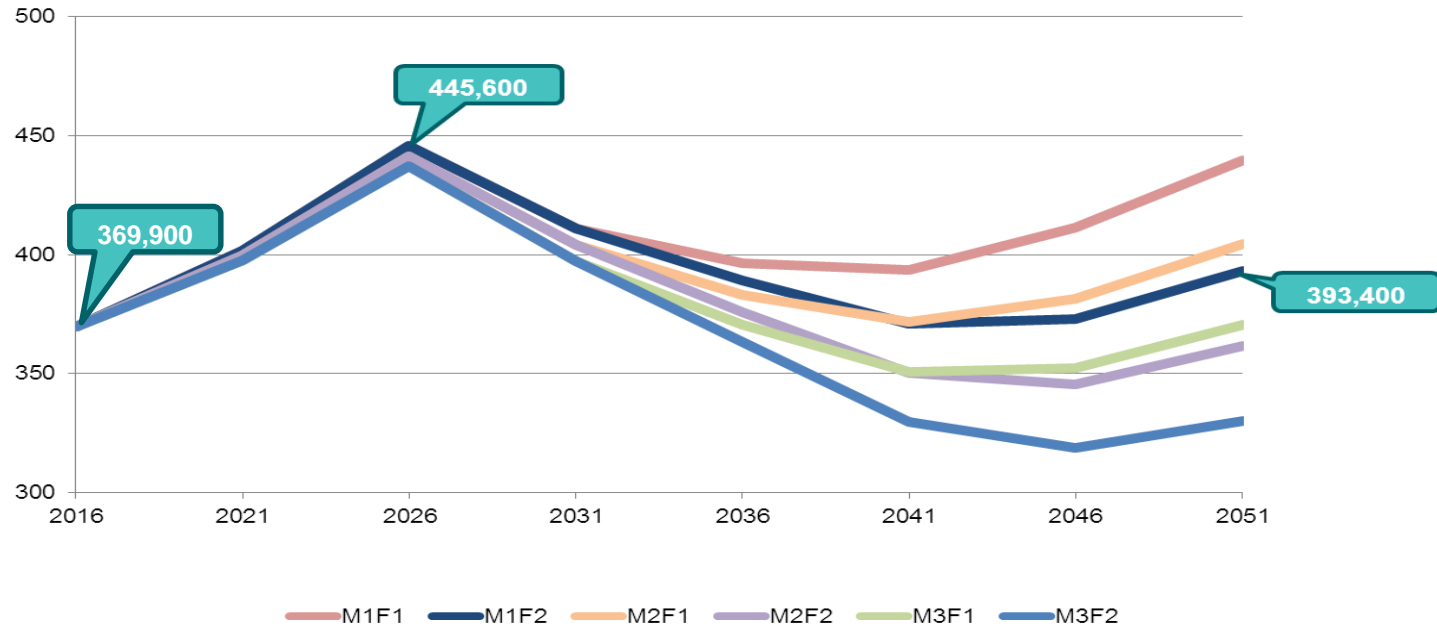

Persons 0-14 as a percentage of Total Population

Projected primary school pupils 2016 – 2051

Projected secondary school pupils, 2016 - 2051

Tenancy Status, Census 2016

Age home ownership became majority tenure category

2016 35 years

2011 32 years

2006 28 years

392,119 Children
Living In Rented
Accommodation

127,098

*around **270%** by*
2051

General health by age group, Census 2016

Map 4.1 Persons aged 65 and over living alone

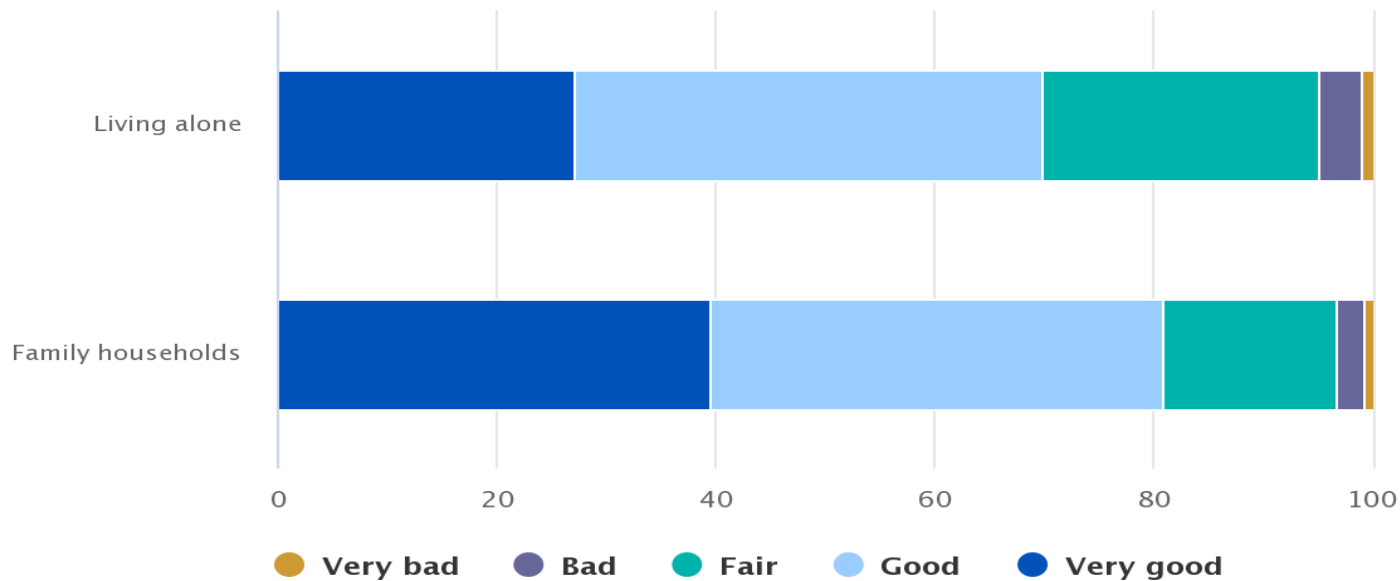

Census 2016

Of the 156,799 people aged 65 and over living alone, 49,820 are aged 80 and over

General health of all persons who lived in family households and aged over 50, 2016

Source: CSO Ireland

Population Structure 2016 and 2051(M1F2)

Age

In 2016 **13.3%**
aged 65+

In 2051 **24.6%**
aged 65+

- *Less very young*
- *Increases across all other age groups*

Median age for selected countries

Japan – Median age **47.3** in 2018

**Ireland and Cyprus
youngest countries
in EU28**

Future Demography of Ireland - Summary

Significant increase in population to 2051 – 1.7 million

Children will account for a lower percentage of the total

- Increased population of older age groups
 - Now: 5 working age for each person aged 65+
 - 2051: 2.5 working age for each person aged 65+

Reduced share of working age population as percentage of total population

- Now : 2 working age for each dependent (0-14 and 65+)
- 2051 : Less than 1.5 working age for each dependent

Ireland 'younger' than most European countries – learn from experience of others
